DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 6-9 & 19-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Block, (U.S. Pat # 6,675,384).

Considering claims 6 & 20, the claimed method for controlling presentation, comprising 'receiving a batch program data, associated' and 'scanning the batch of program data to determined how much of the program data would be blocked and blocking the entire program, if

Art Unit: 2623

the program exceeds a threshold', Block teaches "if a program contains more than the predetermined amount of objectionable material, then the viewer may choose to deny access to the program completely', see col. 13, lines 15-55 & col. 25, lines 1-10.

In particular, Block teaches that the viewer may choose to block a portion of the program. Also the viewer may set a maximum allowable percentage of time of content at specified rating, and if the program exceeds that threshold then block the program. Which reads on the claimed subject matter, col. 13, lines 10-21.

Considering claims 7-8 & 21-22, Block teaches that the threshold may be defined as a unit of time and a percentage of the program, see col. 13, lines 10-35.

Considering claims 9 & 19, the claimed features of a method for formulating and delivering data, comprising elements that corresponds with subject matter mentioned above in the rejection of claims 6 & 20, are likewise treated. As for the claimed 'allowing the user to change the rating', Block teaches the user may change the LIL label, see col. 12, lines 44-65; col. 13, lines 60-65 & col. 14, lines 5-25.

Considering claim 23-24, the claimed subject matter reads on col. 9, lines 41-64; col. 13, lines 15-65.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
